

ADVIZOR® 5.8 Now Available.

Data Discovery and Analysis over the Web Keeps Getting Better and Better.

CHICAGO, IL – August 31, 2011 – ADVIZOR Solutions® today released version 5.8 of its data discovery and business analysis software suite. Built on world class in-memory-management, interactive visualization, and predictive analytics, ADVIZOR empowers business people to understand and analyze information without relying on others to prepare or interpret the results.

ADVIZOR's products are designed for point-and-click ease of use and do not require specialized IT training. ADVIZOR can simultaneously tap into nearly all data sources from the desktop to the enterprise in order to create powerful interactive dashboards powered by its patented Visual Discovery™. ADVIZOR offers both Windows client and also web delivered versions of its products.

The 5.8 release includes substantial enhancements in the following areas:

- Browser Based Navigation Panes. Navigation Panes, which provide page-level help, context and description to ADVIZOR dashboards, have been added as sliding browser panels delivered from ADVIZOR Server. Navigation Panes help end-users understand how to use an ADVIZOR dashboard to answer their key business questions.
- Flight Recorder enhancements. Constraints for Maps, Goal Lines, Data Constellations, and searches in the Data/Summary Sheet have been added to the Flight Recorder. The Flight Recorder has proven key to showing end-users where they are in their analysis, and then allowing them to easily return to any point along their discovery path -- now or in a future session.
- Updated Visualization Charts. Linear trend line equation(s) have been added to the Scatterplot, with the parameters of the equation(s) and the correlation coefficient(s)(r^2) displayed in the Property Grid. All 3D charts are now anti-aliased for better quality.
- Data Loading. Microsoft Excel and Access 2010 are now fully supported in both their 32 and 64 bit versions on 32 and 64 bit versions of ADVIZOR.
- A new "Implementation Guide" has been created.
- Other Updates. This release includes a variety of other updates and performance improvements.

ADVIZOR 5.8 is available today – see www.advizorsolutions.com for more details.

About ADVIZOR Solutions®, Inc.

ADVIZOR Solutions is a leading provider of easy-to-use business analysis software.

Built on patented in-memory-data-management and interactive data visualization software spun out of Bell Labs Research and world class predictive analytics, ADVIZOR enables people to make better and faster fact-based decisions from their business data ADVIZOR enables this through:
